

## TABLE OF CONTENTS

Personnel		v
Publications and Reports		viii
I.	Physical Electronics	1
	Electron Emission Problems	1
	Thermionic Emission from a Planar Molybdenum Crystal	1
	Physical Electronics in the Solid State	2
	Hall Effect in Lead-Sulfide Films	2
	Experimental Techniques	3
	The Spectral Emissivity of Tungsten	3
	High Vacuum Studies: the MassITon	7
	Ionization Gauge Control Circuit	8
	Gaseous Discharges	8
	Ion Generation, Electron Energy Distributions, and Probe Measurements in a Low-Pressure Mercury Arc	8
II.	Microwave Gaseous Discharges	11
	Highly Ionized Microwave Plasma	11
	Diffusion Decay in Neon Afterglows	12
	Microwave Determinations of Frequency of Ionization and Coefficient of Free Diffusion	15
III.	Microwave Spectroscopy	21
	Molecular-Beam Microwave Spectroscopy	21
	Paramagnetic Resonance	22
	Free Radicals in Irradiated Carbon Black	23
IV.	Nuclear Magnetic Resonance and Hyperfine Structure	25
	Hyperfine Structure of the $^3P_1$ State of Mercury by Double-Resonance Methods	25
	Reduction of Drift in Double-Resonance Experiments	25
	Lifetime of $5^3P_1$ Level of Cadmium	28
V.	Microwave Electronics	30
	Noise	30
	Minimum Noise Figure of Traveling-Wave Amplifiers	30
	High-Power Microwave Tubes	34
	Multicavity Klystrons	34
	Stagger-Tuning Experiments on Pulsed Klystrons	37
	High-Perveance Cylindrical Electron Beams	38
	Ferrites	39
	Ferrite Resonance Isolator in Trough Waveguide	39
VI.	Atomic Beams	46
	Measurement of the Velocity of Light	46
	Stark Effect on Hyperfine Structure	51
	Crystal Oven Temperature Control	51

## CONTENTS

VII.	Statistical Communication Theory	53
	Output Distributions of Linear Systems	53
	From the Viewpoint of Given Autocorrelation Functions	53
	From the Viewpoint of Distribution Functions	55
	Formulation of Flow Graphs	58
	Time-Domain Synthesis of Linear Systems	60
	On the Synthesis of Linear Systems for Pure Transmission, Delayed Transmission, and Linear Prediction of Signals	66
VIII.	Processing and Transmission of Information	90
	Channel Capacity without Coding	90
	Amount of Information Provided by a Particular Symbol	93
	Hazards in Sequential Switching Circuits	95
	Pitch-Synchronous Chopping of Speech	99
	Nonlinear Operations on Video Signals	103
	Runs of Constant Intensity in Picture Signals	104
IX.	Transistor Circuits	106
	Voltage-Tuned Transistor-Amplifier	106
X.	Speech Analysis	109
	Vowel Identifier	109
	Stop Studies	117
XI.	Sensory Replacement	118
	Vocatac	118
XII.	Communications Biophysics	122
	Responses from the Auditory Cortex to Tone Pips and Bursts of Noise – An Interpretation in Terms of the Place and Frequency Principles	122
	Pitch Judgments for Repeated Bursts of Tone and Noise	123
	"Off" Responses in the Auditory Nervous System of Anesthetized Cats	127
XIII.	Network Synthesis	129
	Study of the Motions of Two Poles in the Complex Frequency Plane by a Graphical Method	129
XIV.	Microwave Theory	131
	Analysis of Bilateral, Two Terminal-Pair Networks in the Three-Dimensional Hyperbolic Space	131
	Use of Complex Four-Dimensional Quantities in Electro- magnetic Wave Theory	134
