QUARTERLY PROGRESS REPORT No. 56

January 15, 1960

Submitted by: J. B. Wiesner
G. G. Harvey
H. J. Zimmermann

Introduction

This report, the fifty-sixth in a series of quarterly progress reports issued by the Research Laboratory of Electronics, contains a review of the research activities of the Laboratory for the three-month period ending November 30, 1959. Since this is a preliminary report, no results should be considered final.

Following our custom of the past several years, in this issue we preface the report of each research group with a statement of the objectives of the group. These summaries of our aims are presented in an effort to give perspective to the detailed reports of this and ensuing quarters.
