

TABLE OF CONTENTS

Personnel	vii
Publications and Reports	xiv
Introduction	xix

RADIO PHYSICS

I.	Physical Electronics	1
	Meter Protection Circuit	1
II.	Microwave Spectroscopy	5
	An Application of Microwave Frequency Ultrasonics to the Measurement of the Fermi Surface of Gallium	5
	Ultrasonic Attenuation in Superconductors	6
III.	Far Infrared Spectroscopy	23
	Infrared Studies of Perovskite Titanates	23
IV.	Nuclear Magnetic Resonance and Hyperfine Structure	33
	Spins, Moments, and Isotope Shifts in Neutron-Deficient Mercury Isotopes	33
	Spin and Nuclear Moments of Hg ²⁰³	33
	Magnetic Scanning of Mercury 193	35
V.	Microwave Electronics	39
	Submillimeter Generation with High-Density Drifting Plasma	39
	High-Perveance Hollow Electron-Beam Study	45
	Complex Waves in Electron-Beam Waveguides	50
VI.	Radio Astronomy	61
	Millimeter Radio Telescope	61
	Balloon Observations of Microwave Emission from Atmospheric Oxygen	69
	Detection of Scattering Layers in the Upper Atmosphere (60-140 km)	76
VII.	Physical Acoustics	81
	Sound Emission from Karman Vortices	81
	Stability of Parallel Flows	82
VIII.	Noise in Electron Devices	87
	Noise Measurements on Gaseous Optical Maser Oscillators	87

CONTENTS

PLASMA DYNAMICS

IX. Plasma Physics	91
Electron-Energy Decay in the Helium Afterglow	91
Relaxation Rate of Electrons to Equilibrium	99
Effect of Gas Flow on Electrical Properties of a Positive Column	106
X. Plasma Electronics	111
Beam-Plasma Discharges	111
System A	111
System C	115
Rotating Plasma Instabilities	116
Criteria for Determining Absolute Instabilities and Distinguishing between Amplifying and Evanescent Waves	122
Interaction of an Electron Beam with Ions in a Warm Plasma of Finite Transverse Dimensions	131
Fusion Reactor Blanket Experiment: Neutron-Energy Spectrum from a Tritium-Gas Target	137
XI. Plasma Magnetohydrodynamics and Energy Conversion	147
Work Completed	147
Traveling Density Variations in Partially Ionized Gases	147
Liquid Metal Induction Generators	147
Study of Fluid Turbulence	147
Pilot Tube for Use in Magnetohydrodynamic Flow	148
Large-Signal Behavior of a Parametric Magneto-Gasdynamics Generator	155

COMMUNICATION SCIENCES AND ENGINEERING

XII. Statistical Communication Theory	165
Work Completed	165
A Study of the Performance of Linear and Nonlinear Systems	165
Design and Analysis of a DC Tape Recording System Using Two-State Modulation	165
Analog Multiplier Based on a Two-State Modulation System	165
Synchronous Receiver for Digital Multi-Phase Modulation	165
A Multiplex Communication System Using Pseudo-Noise Carriers	166
Measurement of the Kernels of a Nonlinear System of Finite Order	166
A Method of Constructing Function Generators	176

CONTENTS

	Optimum Laguerre Finite-Term Expansion of Functions	178
	Design and Analysis of a DC Tape Recording System Using Two-State Modulation	181
	Experimental Investigation of Threshold Behavior in Phase-Locked Loops	186
	Multiplex Communication System Using Pseudo-Noise Carriers	188
XIII.	Processing and Transmission of Information	193
	Vector Representation of Time-Continuous Channels with Memory	193
XIV.	Speech Communication	203
	Studies of the Dynamics of Speech Production	203
	Design Considerations for an Improved Vocal Tract Analog	206
XV.	Linguistics	215
	One-Way Grammars	215
	Regular Languages and Pushdown Storage Automata	218
	Preliminary Remarks on the Morphophonemic Component of Polish	220
	Deduction of Long \bar{i} in Russian Imperative, Infinitive, and 2 Singular Morphemes	235
	sr/zr Clusters in Old Church Slavonic	236
	Some Remarks on Elementary Transformations	237
XVI.	Communications Biophysics	241
	Random Process Model for the Firing Pattern of Single Auditory Neurons	241
	Auditory Discrimination in the Bullfrog	245
	An RC Model for Spontaneous Activity of Single Neurons	249
	Experiments on Machine Recognition of Connected Handwritten Words	257
XVII.	Neurophysiology	267
	Novel Optical System for Counting Droplets in Suspension	267
XVIII.	Neurology	275
	Work Completed	275
	A Computer-Controlled Experiment in Human Prediction	275
	A Mathematical Model of the Stretch Reflex in Human Muscle Systems	275
	The Role of Head Movements in Human Visual Target Pursuit	276
	Artificial Photosensitization of the Crayfish Ventral Nerve Cord	276

CONTENTS

An Improved Television Pupillometer	276
Investigation of Input Parameters for Digital Analysis of Electrocardiograms	277
Digital Computer Analysis of Nerve Pulse Trains	277
A Device for the Measurement of Finger Tremor	277
Sampling or Quantization in the Human Tracking System	278
A Control System Study of Human Temperature Regulation	278
An Analytic Model for the Human Pupil Light Reflex	278
Pupil Noise – An Example of a Stochastic Process in a Biological System	279
Kinematics and Muscles of the Human Iris	279
Vergence Eye Movements	280
Kinematics and Muscles of the Human Iris	283
Cat Pupil System	284
Smooth Phase of Optokinetic Nystagmus in Man	286
Electrocardiogram Classification	291
Accommodation Tracking	293
Author Index	295
